

## INSTRUCTIONS FOR USE BROWXENNA® HENNA

BrowXenna eyebrow henna is No.1 in the world.\*  
The first henna created specifically for eyebrow coloring

### ADVANTAGES OF BROWXENNA HENNA:

- Phenomenal color fastness: up to 14 days on the skin, up to 6 weeks on the hairs\*.
- Strengthening and nourishing the hairs.
- A unique combination of natural ingredients: Lawsonia, Indigofera, Amla, Shikakaya, Hibiscus and Tea Tree.
- A wide palette of shades for any type of appearance.

\*Durability depends on the individual characteristics of the skin and hairs, as well as on the technique and technology of coloring.

### CONTRAINDICATIONS FOR HENNA TINTING:

- Intolerance to the tint ingredients.
- Be sure to test the sensitivity of the skin to the ingredients before the procedure. Apply the color mixture to the sensitive area of your skin - between your fingers or to the inner crease of your elbow. Wait until it dries completely, rinse with water. If there is NO redness or irritation of the skin after 48 hours, you can start coloring.
- Violation of the skin integrity or inflammation in the coloring area. Inflammatory and infectious eye diseases.
- Diseases of the thyroid gland, changes in hormonal levels, taking hormonal drugs.
- Chemical / laser peeling.
- It is recommended to carry out the procedure at least 7 days after the superficial at-home peeling and at least 30 days after the medium chemical peeling

⚠ Please note: during pregnancy (especially the first trimester) and lactation, a consultation with a doctor is required before the procedure!

### TRY DIFFERENT CONSISTENCIES:

The MILK consistency will allow you to color the hairs and create a light shadow on the skin.

The SOY SAUCE consistency will allow you to get more intense color on the skin.

The YOGURT consistency will leave a very rich mark on the skin.

## HOW TO PREPARE EYEBROWS FOR HENNA TINTING

Thoroughly cleanse the eyebrow area with BrowXenna® Shampoo-foam for deep cleansing of eyebrows. If there is a flaky skin, use BrowXenna® Enzyme brow scrub. Wash off any residue of BrowXenna® Enzyme scrub / BrowXenna® Shampoo-foam with a BrowXenna® Two-phase tonic for henna washing off.

## HOW TO PREPARE HENNA MIXTURE FOR EYEBROW TINTING

Shake the bottle!  
In a non-metallic container, mix BrowXenna® Henna powder with BrowXenna Hyaluronic Base or BrowXenna Mineral solution.  
Add more BrowXenna® Henna or BrowXenna Hyaluronic Base/BrowXenna Mineral solution.

## EYEBROW TINTING

1. With a flat, beveled brush (for example, BrowXenna® Brush superfine №2) apply a thin layer of the BrowXenna® Henna on the eyebrows, distributing the composition over the skin and hairs. Keep the layer evenly applied.

2. Use up to three layers to achieve a rich mark on a skin.

3. Be sure to wait until the previous layer is completely dry (≈1-3 minutes) before applying the next.

4. When completely dry, remove BrowXenna® Henna with a cotton pad moistened with BrowXenna® Two-phase tonic for henna washing off.

5. Do not leave the dried composition on the eyebrows to avoid overdrying of the skin and hairs. Do not try to remove BrowXenna® Henna dry, it will shorten the wear time and injure the skin and hairs. Do not rinse off BrowXenna® Henna with oils, this will significantly shorten the wearing time of the tint on the skin.

6. For the final look, use BrowXenna® Styling soap or BrowXenna® Eyebrow lift and fix gel.

You can learn more about BrowXenna products on our YouTube channel BrowXenna Russia.

## RECOMMENDATIONS AND PRECAUTIONS:

THE BROWXENNA® PRODUCT IS INTENDED FOR PROFESSIONAL USE ONLY.

- The recommended interval between henna tinting procedures is every 3-4 weeks. Avoid contact with water for the first 24 hours after the procedure.
- Refrain from visiting the sauna, swimming pool, solarium for the first 24 hours after the procedure.
- After the henna is completely removed from the skin, use the following products to moisturize and nourish the eyebrows: BrowXenna® BOTOX-X care product for eyebrows and eyelashes/ BrowXenna® Oil for eyelash and eyebrow growth for dry and flaky skin, BrowXenna® Serum for eyebrow growth for oily skin or dry hair.

### ATTENTION!

- Do not use alcohol to prepare your skin.
- Do not use BrowXenna® Henna for eyelash tinting.
- Do not store the ready-made henna mixture for more than 20 minutes.
- Use disposable gloves.

MINOR CHANGES IN COLOR SATURATION AND CONSISTENCY ARE POSSIBLE FROM LOT TO LOT, BECAUSE THE PRODUCT IS TERROIR, IT CONSISTS ABOUT 98% OF NATURAL INGREDIENTS.

**IMPORTANT:** BrowXenna® Henna will not allow you to get the tinting result lighter than the original hair color

## SHADE PALETTE

	# 201 PEARL BLONDE
	# 202 LIGHT BLONDE
	# 203 LIGHT CHESTNUT

Sachet (3 g) - up to 50 procedures

Please note: you cannot store BrowXenna® Henna in a refill sachet, as the packaging is metallized. After opening, oxygen enters the bag and the henna is oxidized. This can negatively affect on the product quality and the color result.

Store in a cool, dry place, out of reach of children and animals.  
Shelf life: 36 months.  
Shelf life after opening: 12 months.

## THE INGREDIENTS OF THE «BLONDE» AND «BRUNETTE» RANGES ARE DIFFERENT:

All «Brunette» shades, #205 Dark Blonde, #110 Graphite Concentrate: Lawsonia Inermis Leaf Extract, Indigofera Tinctoria Leaf Extract, Magnesium Carbonate, Citric Acid, Sodium Persulfate, P-Phenylenediamine (0,2%), P-Aminophenol, Sodium Sulfite, Theobroma Cacao Leaf Cell Extract, Acacia Concinna (Shikakai) Fruit Powder, Emblica Officinalis (Amla) Fruit Powder, Hibiscus Rosa - Sinensis (Hibiscus) Flower Powder, Melaleuca Alternifolia (Tea Tree) Leaf Extract, Myristica Fragrans (Nutmeg) Extract, Sapindus Trifoliatus Fruit Extract.

«Blonde» shades and #210 Amber concentrate: Lawsonia Inermis Leaf Extract, Indigofera Tinctoria Leaf Extract, Magnesium Carbonate, Citric Acid, Sodium Sulfite, Theobroma Cacao Leaf Cell Extract, Acacia Concinna (Shikakai) Fruit Powder, Emblica Officinalis (Amla) Fruit Powder, Hibiscus Rosa - Sinensis (Hibiscus) Flower Powder, Melaleuca Alternifolia (Tea Tree) Leaf Extract, Myristica Fragrans (Nutmeg) Extract, Sapindus Trifoliatus Fruit Extract.

#101, #102, #103, #104, #105, #106, #107, #108, #201, #205 shades are coloring the skin and can be used separately.

#202, #203, #204 shades do not give a rich and long-lasting color of the skin. They are mainly used in conjunction with darker shades to create a natural effect when coloring the eyebrows of blondes and light blond clients.

#110, #210: are concentrates and are NOT used on their own. A maximum of 20% concentrate may be added to the color mixture.

## NEW

### HYALURONIC BASE

The unique formula of the Hyaluronic base helps to prolong coloring result. Active nutritional ingredients of the unique technology help to avoid overdryng, restore damaged hairs, effectively moisturize and conditioning, make the hair strong and elastic.
